LIST OF FIGURES

LIST OF TABLES

CAVEAT

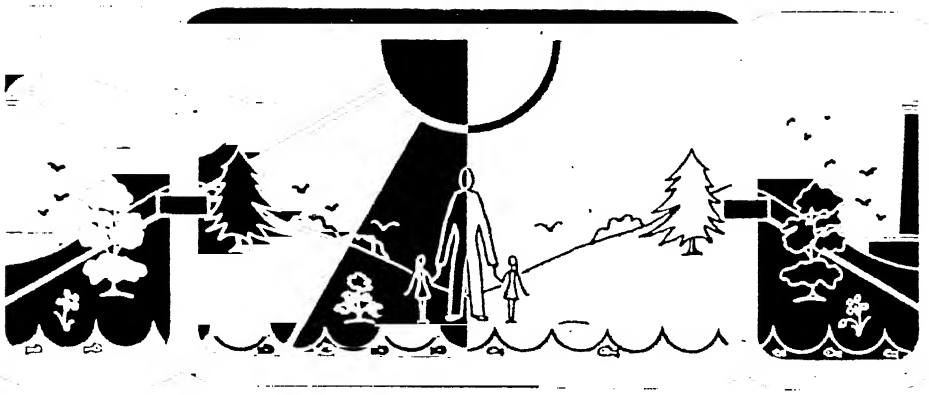
To avoid confusion, the definitions provided in the overview section (p. 5,6) should be referred to when reading the tables and figures in the Executive Summary (i.e., funding agency is distinctly different from monitoring agency.

When the total number of projects in the document differs from the totals in any one table or figure - such as pollutants or area of research - the difference is accounted for by those projects that did not address themselves (in actuality or in reporting) to that topic. These tables and figures were based on the subset of total projects for which this information was available - this often was a substantial difference from the Inventory totals.

The other qualifier to bear in mind is that projects relating to several technologies or areas of research will be counted as a project for each related category total. While this results in "double counting" of project totals, the related dollar amounts have been fractionated to make the dollars "additive".

The on-line data base as now available differs from this printed version in several ways. One important addition to the computerized version is 438 EPA projects (mainly health effects) that were provided too late for the published version.

Finally, this compilation of projects, although unique and containing the majority of Federal Energy Related Environmental R&D is not 100% complete, nor is it uniform in its collection and coverage of each agency.



1. INTRODUCTION*

The FY 1978 Federal Inventory is a compilation of 3225 federally funded energy-related environmental and safety research projects. It consists of three volumes: an executive summary providing an overview of the data (Volume I), a catalog listing each Inventory project followed by series of indexes (Volume II), and an interactive terminal guide giving instructions for on-line data retrieval (Volume III). Volume I reviews the inventory data as a whole and also within each of three major categories: biomedical and environmental research, environmental control technology research, and operational safety research.

Project information was collected from the following federal agencies through use of a questionnaire (see sample Appendix A): Department of Agriculture, Department of Commerce, Department of Defense, Department of Energy, Department of Health, Education, and Welfare, Department of the Interior, Department of Transportation, U.S. Environmental Protection Agency, National Aeronautics and Space Administration, National Science Foundation, Nuclear Regulatory Commission, Tennessee Valley Authority, and U.S. Coast Guard. The principal contacts at these agencies for the information published in this Inventory are listed in Appendix B. A list of agency abbreviations is given in Appendix C. Appendix D is a complete list of the log or responding agencies.

The Inventory resulted from the passage of two Congressional acts — the Energy Reorganization Act of 1974, PL 93-438, and the Federal Nonnuclear Energy Research and Development Act of 1974, PL-93-577. This

* See CAVEAT (p. viii).

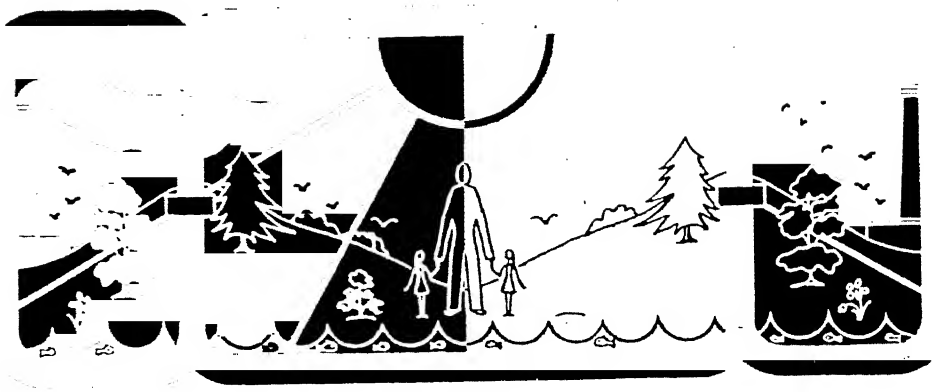
legislation authorized the administrator of the Energy Research and Development Administration (ERDA) to establish programs to evaluate the adverse environmental effects of energy development and utilization, to minimize duplication of effort among federal agencies, and to submit a comprehensive energy research, development, and demonstration plan to Congress on an annual basis. The initial Inventory was published in October 1975 and covered FY 1974 and FY 1975 research. The Inventory is published annually by the Office of the Assistant Secretary for the Environment, Department of Energy. The number of projects, the technical information content, and the number of federal agencies responding have been expanded each year. Also, in this edition the contributing agencies are listed by agency subdivision, where possible, to better define the relationship between project and agency.

As well as providing an overview of current work in energy-related areas of environmental, health, and safety research, the Inventory provides a means for determining general funding levels for research related to specific energy technologies, for relating agency effort to technologies, and for assessing the sufficiency of federally sponsored research where gaps and overlaps occur. This information can be used in planning future research efforts and in locating specific types of research or researchers. Users include federal, state, and local agencies interested in utilizing federal research results or in establishing complementary programs. Both private industry and government agencies use the Inventory to locate experts in specific subject areas.

Users should realize that while the data is relatively complete, the Inventory does not provide total coverage of federal research. Data collection is limited by the ability to locate pertinent projects and the cooperation of the various agencies in supplying appropriate data. A vigorous effort is made each year to identify all relevant federal programs and projects and to improve the accuracy of the data. Pertinent projects may have been excluded for various semantic, mechanical, and/or philosophical reasons. Because technologies and specific research topics (e.g., pollutants) cut across a wide variety of scientific disciplines, it is difficult at times to identify appropriate research for inclusion in the Inventory. Also, because there is no universally accepted definition for

energy-related environmental and safety research, exclusion of appropriate projects and/or the inclusion of less appropriate projects may occur.

In addition to the three printed volumes, access to the computerized data base is available. Data are maintained on the DECsystem-10 computer at Oak Ridge National Laboratory for on-line retrieval using System 1022. Volume III is an instruction manual for using System 1022 to handle the Inventory data. Access to System 1022 can be obtained through Janice Barker, Oak Ridge National Laboratory (615-574-7577, FTS 624-7577). The Inventory is also available on RECON (the Department of Energy on-line retrieval system). Access to RECON can be obtained through Charles Spath, Technical Information Center, Oak Ridge, Tennessee (615-576-1194, FTS 626-1194).



2. OVERVIEW OF INVENTORY DATA *

Volume I of the Inventory consists largely of tables and graphs which summarize data obtained from 14 federal agencies on 3225 projects. A small percentage of the projects was included in the Inventory despite incomplete data provided on the questionnaires, thus affecting the summary data. Because the questionnaire format allowed projects to relate to several technology areas and research categories, the subtotals will not always be additive to the actual total Inventory project number. For example, a project involved in research applied to three energy sources will be counted as one project doing research in each energy source and will therefore be counted three times. However, the total project funding will be additive to total Inventory funding because individual project dollars are divided by the percentage reported in the questionnaire. This applies to technology and research categories.

An understanding of the terms defined below is needed before using the summary tables and graphs which follow:

1. *log or responding agency* — the agency reporting a project for inclusion in the Inventory
2. *monitoring agency* — the agency responsible for direct contact with the principal investigator and the performing organization
3. *funding agency* — the organization providing all or part of the funds for all or part of the project
4. *principal investigator* — the person actually performing the project work or having direct supervisory project responsibility

* See CAVEAT (p. viii).

5. *performing organization* — the organization providing the principal investigator with administrative, facility, and/or logistic support
6. *fossil energy source* — the energy source group containing fossil fuels (fossil general, coal, oil, gas, oil shales, and tar sands)
7. *nuclear energy source* — the energy source group containing nuclear fuels (nuclear general, nuclear fission, and nuclear fusion)
8. *multienergy* — the energy source category including projects involved with more than one energy source; the specific energy sources may not be in the same energy source group (e.g., fossil and nuclear or fossil general and oil and gas)

Tables 2.1 and 2.2 show the total number of projects reported by the log agency and the total number of dollars reported by the funding agency respectively. As can be seen from these tables, the Department of Energy has the largest number of projects and the greatest amount of funding for energy-related projects in this Inventory. Over 80% of the projects represent the efforts of four agencies (Department of Energy, U.S. Environmental Protection Agency, Department of Health, Education, and Welfare, and Nuclear Regulatory Commission).

Table 2.3 outlines the relationships among funding agency, energy source involved, and the research category to which the projects apply. The table provides an overview of the major areas of interest by energy source and research category for the various funding agencies and illustrates current research priorities among funding agencies. Again, it should be noted that the number of projects in Table 2.3 may not be additive to the total number of Inventory projects.

A breakdown by pollutants for the entire Inventory is given in Table 2.4. This shows total research dollars for pollutants only, and no attempt is made to associate pollutants with other technical areas in this section. In addition, Table 2.4 provides a breakdown of pollutants for the three research categories — biomedical and environmental research, environmental control technology, and operational safety. Table 2.5 shows the relationship between monitoring agency and energy source.

Figure 2.1 provides a comparison of FY 1976, FY 1977, and FY 1978 percentages of dollars spent on various energy sources. Since the terminology for specific energy sources has changed in the three years, the

energy sources for the years have been grouped under like terminology. Those groups are fossil fuels, nuclear, hydroelectric, geothermal, solar, and conservation.

Figure 2.2 details the level of funding for the entire Inventory based on the type of research activity reported (questionnaire item A). The highest funded activity is applied research, followed by basic research, and then by field studies. The rest of the research activities account for the remainder of total funding.

The relationship between monitoring agency and energy source supported is shown in Fig. 2.3. A clear association can be made between agencies and specific energy sources. The total dollars monitored by each agency is given at the bottom of its respective bar on the graph. A breakdown of total dollars by research category and subcategory is provided in Fig. 2.4. The health effects subcategory received the greatest proportion of funds.

Figure 2.5 relates funding, where applicable, to the environmental background associated with pollutants under study (questionnare item E). The atmospheric and terrestrial environmental areas represent a major portion of expended funds.

Table 2.1. Federal Agency Responses

Responding agency	Total number of projects reported	Number of projects with funds reported	Number of projects with no funds reported

3. BIOMEDICAL AND ENVIRONMENTAL RESEARCH SUMMARY *

This section provides an overview of research projects applicable entirely or in part to biomedical and environmental research. This category is further divided into five subcategories: (1) characterization, measurement, and monitoring; (2) physical and chemical processes and effects; (3) integrated assessment; (4) health effects; and (5) ecological/biological processes and effects. Each of these subcategories has been further delineated with respect to objective, as indicated in the questionnaire (Appendix A).

Tables 3.1, 3.2, and 3.3 and Figs. 3.1, 3.2, and 3.3 parallel those in Sect. 2. They provide the following summary data for biomedical and environmental research:

- number of projects
- total funding dollars
- relationships among funding agencies, energy source, and biomedical and environmental research subcategory
- funding breakdown by type of research activity
- relationship between monitoring agency and energy source
- comparison of FY 1976, FY 1977, and FY 1978 expenditures by energy source

Three additional tables provide a more detailed picture of the relationship between energy source and biomedical and environmental research funding. Table 3.4 relates the major research subcategories to individual energy sources with a funding total for each relationship. Table 3.5

*See CAVEAT (p. viii).

gives the funding relationship between funding agency and biomedical and environmental research subcategory. See Table 2.4 for the distribution of funds that was reported for each pollutant in the biomedical and environmental research category.

4. ENVIRONMENTAL CONTROL TECHNOLOGY RESEARCH SUMMARY *

This section provides summary tables and figures for those projects designated wholly or partially as environmental control technology research. The sample questionnaire (Appendix A) describes the environmental control technology subcategories — air quality controls, solid waste management and land reclamation, water control and protection, disposal of surplus contaminated equipment and facilities, and energy materials transport. Tables and figures in this section generally correspond to those in the preceding sections. Funding by pollutants is found in Table 2.4.

*See CAVEAT (p. viii).

Table 4.1. Federal Agency Responses — Environmental Control Technology Research Projects

Responding agency	Total number of projects	Number of projects with funds reported	Number of projects with no funds reported
Department of Agriculture[a]	107	0	107

5. OPERATIONAL SAFETY RESEARCH SUMMARY*

Summary tables and figures are presented in this section for those projects designated applicable, wholly or partially, to operational safety research. Subcategories of operational safety research are environmental, safety, health assurance measurement and monitoring; environmental, safety, health standards and criteria; environmental, safety, health support and assistance; and special operations. Tables and figures in this section generally correspond to those of preceding sections. Funding by pollutants is given in Table 2.4.

*See CAVEAT (p. viii).

APPENDIX A

INVENTORY QUESTIONNAIRE (FORM DOE/EV-294)

FORM DOE/EV-294
(4-78)

FORM APPROVED
OMB NO. 038-R0188

Inventory of Federal Energy-Related Environmental and Safety Research

FY 1978

DEPARTMENT OF ENERGY
Office of the Assistant Secretary
for Environment
Division of Environmental Impacts

INSTRUCTIONS FOR PROJECT DOCUMENTATION -- INVENTORY OF

FEDERAL ENERGY-RELATED ENVIRONMENTAL AND SAFETY RESEARCH

For further assistance contact DOE, Division of Environmental Impacts:
Phone (301) 353-3311 or FTS 233-3311.

SECTION I - ADMINISTRATIVE

A. PROJECT TITLE

1. Project Title

Use official title of project or contract in 25 words or less.

2. Project Control Number

The numerical or letter-number combination that the performing organization uses and recognizes as a unique descriptor of the project. (This number may be one assigned by the monitoring organization.)

3. Date Questionnaire Completed

This date determines the currency of the information being supplied; month and year is sufficient.

B. PROJECT STATUS

1-3. Check the status of the project in FY 1978.

C. PRINCIPAL INVESTIGATOR

1-5. Name and Address

This information identifies the person actually performing the experiment or having direct supervisory responsibility for the project.

6. Performing Organization

The organization that provides the principal investigator with administrative, facility, and/or logistic support. In those areas where a grant or contract is with a single investigator the performing organization should be indicated as Principal Investigator.

7. Principal Investigator's Telephone Numbers

Enter the commercial telephone number and/or the Federal TeleCommunications System telephone number as appropriate.

D. PROJECT MONITOR

1. Monitoring Agency

The Federal Agency having direct contact with the principal investigator and the performing organization. Use appropriate abbreviation at the Departmental level (e.g., DOE, DHEW, EPA, DOA, DOC, DOD, DOI, DOT, NSF, NRC, TVA, etc.).

2. Monitoring Agency Division or Office

Write the complete title of the subunit within the monitoring agency that has cognizance or direct supervision over the principal investigator and the performing organization.

3. Monitor's Project Officer

The individual in the monitoring organization who has direct cognizance of the project and who provides a point of contact with the principal investigator.

4. Project Officer's Telephone Numbers

Enter the commercial telephone number and/or Federal TeleCommunications System telephone number as appropriate.

E. PROJECT ACCOUNTING

1-5. Type of Funding Activity

The method chosen by the funding organization to provide the monetary resources for the project. Provide grant number, contract number or, in the case of an interagency agreement, the name of the funding agency.

6-7. Funding Organization(s)

The organization(s) (Agency, Departmental, or Institutional level) providing part or all of the funds for part or all of the performance or the project. In most cases, the funding agency is the same as the monitoring agency. When there are two or more funding agencies, indicate amount for each separately. Indicate funds as dollars in thousands.

F. PROJECT SCHEDULE

1. Date Project Originated

Enter month and year.

2. Expected End Date

The month and year the project is expected to terminate. If there is no recognized end date, enter N/A.

SECTION II - GENERAL CATEGORIES

A. TYPE OF ACTIVITY

Check one or more activities as appropriate to your project. If some combination of activities 1 through 11 does not adequately describe your project, use item 12 to specify.

B. RELATED ENERGY SOURCE

This subsection categorizes your project by its relationship to an energy source. Use percentages to indicate emphasis. Examples: If your project concerns handling of waste heat from power plants, it may apply to Fossil Fuels/General (25%), Nuclear Fuels/General (25%), Solar/General (25%), and Geothermal/General (25%). If the project involves utilization or conversion of waste heat, it may apply only to Conservation/General (100%). If the project relates to general environmental impacts and is applicable to all energy sources, you should categorize the project as "ALL OF THE ABOVE" (100%).

C. STAGE OF ENERGY CYCLE

This subsection categorizes your project by its relation to energy production cycle stages. Use percentage(s) to indicate the stage(s) of the cycle which your project emphasizes. If your project encompasses two or more stages, indicate appropriate percentages for the several stages. If your project is general in nature and is supportive of all cycles or processes, mark 100% in the "ALL OF THE ABOVE" box.

D. POLLUTANTS CONSIDERED

Check those contaminants pertaining to your project.

E. ENVIRONMENTAL BACKGROUND

If your project is concerned with the environmental background in which pollutants are deposited, through which pollutants are transported, or in which pollutant-affected organisms or ecological systems develop, categorize by checking appropriate circle(s).

F. GEOGRAPHIC REGIONS

If your project has a special relationship or direct applicability to a particular geographic area, check the appropriate circle(s). (See map, Attachment A, for Region definitions.)

G. U. S. COASTLINES

If your project has a special relationship or direct applicability to a particular U. S. Coastline, check the appropriate circle(s). (See map, Attachment A, for Coastline limits.)

H. AQUATIC AREAS

Check the type of body of water to which your study is directly related.

SECTION III - OPERATIONAL SAFETY R&D CATEGORIES

Indicate the type of research and emphasis by percentages. Percentages should total 100%.

SECTION IV - ENVIRONMENTAL CONTROL TECHNOLOGY R&D CATEGORIES

Indicate the type of research and emphasis by percentages. Percentages should total 100%.

SECTION V - BIOMEDICAL AND ENVIRONMENTAL RESEARCH CATEGORIES

Use percentage(s) to indicate project emphasis according to the subcategories listed. The percentages in each subsection should total 100%.

SECTION VI - PROJECT DESCRIPTION

A. DESCRIPTION IN SUMMARY FORM

1. Objective(s)

State project objectives, quantifying where possible (e.g., "demonstrate 95% recovery of sulfur from raw gas with molten salt recycling at a rate of one gallon per minute").

2. Approach

Describe the technical approach to the project, i.e., how the work is to be done.

3. Product/Results

Describe the final products or results expected from the project and those obtained to date. The importance and relevance of the results to energy-related environmental and safety projects should also be indicated.

B. PUBLICATIONS

Include all publications in the following reference format.

Reports:	Author(s), "Title," Series No., Publishing Agency or University, date.
Journals:	Author(s), "Title," Journal Name, Vol. No. (Series No.), date.
Books:	Author(s), Title, Publishing Co., Location, date.
Chapters Within Books	Author(s), "Title," in Book Title, Publishing Co., Location, date.

SECTION VII - KEY WORDS

Circle up to six key words that best characterize your project. If the Key Word List is inadequate, provide up to two additional words which describe your project (maximum total eight words). List and define additional words in space provided at the bottom of the page.

23. ○ DISSOLVED SOLIDS/SALINITY
24. ○ NUTRIENTS
25. ○ MICROBIOLOGICAL AGENTS
26. ○ PESTICIDES/HERBICIDES
27. ○ OTHER (Specify) _____
28. ○ NOT APPLICABLE

FORM DOE/EV-294
(4-78)

INVENTORY OF FEDERAL ENERGY-RELATED ENVIRONMENTAL AND SAFETY RESEARCH

PROJECT CONTROL NUMBER_____

SECTION II — GENERAL CATEGORIES (Continued)

(Check Appropriate Circles)

E. ENVIRONMENTAL BACKGROUND

1. ○ ATMOSPHERIC
2. ○ TERRESTRIAL
3. ○ FRESHWATER
4. ○ ESTUARINE
5. ○ MARINE
6. ○ NOT APPLICABLE

F. GEOGRAPHIC REGIONS (see instruction & map)

1. ○ NEW ENGLAND
2. ○ NEW YORK -- NEW JERSEY
3. ○ MIDDLE ATLANTIC STATES
4. ○ SOUTH ATLANTIC STATES
5. ○ MIDWEST
6. ○ SOUTHWEST
7. ○ CENTRAL STATES
8. ○ NORTH CENTRAL STATES
9. ○ WEST
10. ○ NORTHWEST
11. ○ HAWAII
12. ○ ALASKA
13. ○ PUERTO RICO
14. ○ CONTINENTAL (all states excluding Alaska, Hawaii)
15. ○ INTERNATIONAL (excluding U.S.)
16. ○ WORLDWIDE (including land & water)
17. ○ NOT APPLICABLE

G. U.S. COASTLINES (see instructions & map)

1. ○ NORTHEAST COAST
2. ○ SOUTHEAST COAST
3. ○ GULF COAST
4. ○ WEST COAST
5. ○ NORTHWEST COAST
6. ○ ALASKAN COAST
7. ○ HAWAIIAN COAST
8. ○ PUERTO RICAN COAST
9. ○ NOT APPLICABLE

H. AQUATIC AREAS

1. ○ DEEP OCEAN
2. ○ CONTINENTAL SHELF
3. ○ LAKE
4. ○ RIVER
5. ○ SURFACE WATERSHED
6. ○ GROUNDWATER
7. ○ IMPOUNDMENT (man-made lake)
8. ○ NOT APPLICABLE

SECTION III — OPERATIONAL SAFETY R&D CATEGORIES (enter %)

A .

RESEARCH TO ENSURE THAT ALL ENERGY-RELATED OPERATIONS ARE CONDUCTED IN A MANNER THAT WILL MINIMIZE RISKS TO THE HEALTH AND SAFETY OF THE PUBLIC AND EMPLOYEES, AND WILL PROVIDE ADEQUATE PROTECTION OF PROPERTY AND THE ENVIRONMENT — INCLUDES:

1. ☐ ENVIRONMENTAL, SAFETY, HEALTH ASSURANCE MEASUREMENT AND MONITORING
2. ☐ ENVIRONMENTAL, SAFETY, HEALTH STANDARDS AND CRITERIA
3. ☐ ENVIRONMENTAL, SAFETY, HEALTH SUPPORT AND ASSISTANCE
4. ☐ SPECIAL OPERATIONS (site-specific)

100%

○ NOT APPLICABLE

SECTION IV — ENVIRONMENTAL CONTROL TECHNOLOGY R&D CATEGORIES (enter %)

A.

ACTIVITIES DIRECTED AT RESEARCH, DEVELOPMENT AND DEMONSTRATION OF PROCESSES, PROCEDURES, SYSTEMS, SUBSYSTEMS, AND STRATEGIES WHICH DIRECTLY OR INDIRECTLY ELIMINATE, MINIMIZE, OR MITIGATE ENVIRONMENTAL IMPACTS — INCLUDING:

1. ☐ AIR QUALITY CONTROLS
2. ☐ SOLID WASTE MANAGEMENT AND LAND RECLAMATION
3. ☐ WATER CONTROL AND PROTECTION
4. ☐ DISPOSAL OF SURPLUS CONTAMINATED EQUIPMENT AND FACILITIES
5. ☐ ENERGY MATERIALS TRANSPORT

100%

○ NOT APPLICABLE

FORM DOE/EV-294
(4-78)

INVENTORY OF FEDERAL ENERGY-RELATED ENVIRONMENTAL AND SAFETY RESEARCH

PROJECT CONTROL NUMBER_____

SECTION V — BIOMEDICAL AND ENVIRONMENTAL RESEARCH CATEGORIES (enter %)

A. CHARACTERIZATION, MEASUREMENT, AND MONITORING

1. [ ] CHARACTERIZATION - BASELINE MEASUREMENTS
2. [ ] CHARACTERIZATION - OPERATING SITE MEASUREMENTS
3. [ ] ADVANCED CONCEPTS, COMPONENTS AND SYSTEMS
4. [ ] APPLIED SYSTEMS
5. [ ] QUALITY ASSURANCE AND STANDARDS
6. [ ] OCCUPATIONAL HEALTH MONITORING
7. [ ] PUBLIC HEALTH MONITORING

100%

○ NOT APPLICABLE

B. PHYSICAL AND CHEMICAL PROCESSES AND EFFECTS

1. [ ] ENVIRONMENTAL TRANSPORT, DISPERSION AND DIFFUSION
2. [ ] PHYSICAL AND CHEMICAL TRANSFORMATION OF POLLUTANTS
3. [ ] PROCESSES BY WHICH POLLUTANTS ARE REMOVED FROM LAND, AIR AND WATER
4. [ ] POLLUTANT EFFECTS ON MATERIALS
5. [ ] TERRESTRIAL DISTURBANCES RESULTING FROM RESOURCE EXTRACTION
6. [ ] METEOROLOGICAL/CLIMATIC EFFECTS OF HEAT, MOISTURE AND POLLUTANT RELEASES
7. [ ] RESEARCH ON MEASUREMENT OF POLLUTANTS IN ENVIRONMENTAL MEDIA
8. [ ] RESEARCH TO DETERMINE ULTIMATE ENVIRONMENTAL FATE

100%

○ NOT APPLICABLE

C. INTEGRATED ASSESSMENT

1. [ ] ENVIRONMENTAL INFORMATION SYSTEMS
2. [ ] INTEGRATED HEALTH/ECOLOGICAL ASSESSMENT
3. [ ] TECHNOLOGY IMPACT ASSESSMENT
4. [ ] REGIONAL ENVIRONMENTAL ASSESSMENT
5. [ ] NATIONAL ENVIRONMENTAL ASSESSMENT
6. [ ] ENVIRONMENTAL POLICY ANALYSIS

100%

○ NOT APPLICABLE

D. HEALTH EFFECTS

1. [ ] CARCINOGENESIS
2. [ ] TERATOGENESIS
3. [ ] MUTAGENESIS
4. [ ] METABOLIC/ELIMINATION
5. [ ] HUMAN DAMAGE, REPAIR AND RECOVERY
6. [ ] RENAL/HEPATIC
7. [ ] IMMUNOLOGIC/HEMATOLOGIC
8. [ ] CARDIOVASCULAR
9. [ ] GASTROINTESTINAL
10. [ ] MUSCULAR/SKELETAL
11. [ ] RESPIRATORY
12. [ ] NEUROLOGIC/NEUROBEHAVIORAL
13. [ ] NONHUMAN DOSE-EFFECTS STUDIES
14. [ ] HUMAN HAZARD/RISK ASSESSMENT
15. [ ] EPIDEMIOLOGICAL STUDIES

100%

○ NOT APPLICABLE

E. ECOLOGICAL/BIOLOGICAL PROCESSES AND EFFECTS

1. [ ] STRUCTURE/FUNCTION/MANAGEMENT OF ECOLOGICAL BIOLOGICAL SYSTEMS
2. [ ] POLLUTANT FATE/CYCLING IN ECOLOGICAL BIOLOGICAL SYSTEMS
3. [ ] ECOLOGICAL/BIOLOGICAL RESPONSE/RECOVERY FROM PHYSICAL DISTURBANCES (i.e. Thermal Changes)
4. [ ] ECOLOGICAL/BIOLOGICAL RESPONSE/RECOVERY FROM CHEMICAL DISTURBANCES
5. [ ] ECOLOGICAL/BIOLOGICAL RESPONSE/RECOVERY FROM BIOLOGICAL DISTURBANCES

100%

○ NOT APPLICABLE

Assistant Secretary for Health (HEW/ASH)	031001-032000
National Institute for Occupational Safety and Health (HEW/NIOSH)	032001-033000
National Institute of Environmental Health Sciences (HEW/NIEHS)	033001-034000
Office of Associate Director for Genetics (HEW/NIEHS/ADG)	033301-033310
Biometry Branch (HEW/NIEHS/BB)	033311-033330
Environmental Biology and Chemistry Branch (HEW/NIEHS/EBC)	033331-033350
Office of Health Hazards Assessment (HEW/NIEHS/HHA)	033351-033360
Laboratory of Biochemical Genetics (HEW/NIEHS/LBG)	033361-033380
Laboratory of Behavioral and Neurological Toxicology (HEW/NIEHS/LBNT)	033381-033400
Laboratory of Environmental Biophysics (HEW/NIEHS/LEB)	033401-033420
Laboratory of Environmental Mutagenesis (HEW/NIEHS/LEM)	033421-033470
Laboratory of Environmental Toxicology (HEW/NIEHS/LET)	033471-033500
Laboratory of Pharmacology (HEW/NIEHS/LP)	033501-033520
Laboratory of Pulmonary and Functional Toxicology (HEW/NIEHS/LPFT)	033521-033540
Laboratory of Pharmacokinetics (HEW/NIEHS/LPK)	033541-033550
Extramural Program — R01ES Series (HEW/NIEHS/R01ES)	033601-033800
Extramural Program — 1 R01ES Series (HEW/NIEHS/1R01ES)	033801-033900
Extramural Program — P01ES Series (HEW/NIEHS/P01ES)	033901-033910
Extramural Program — R23ES Series (HEW/NIEHS/R23ES)	033911-033920
National Cancer Institute (HEW/NCI)	034001-035000
National Institute of Dental Research (HEW/NDR)	035001-035100
National Institute of General Medical Sciences (HEW/NGMS)	035101-035200

Log agency	Federal Inventory log number range
Division of Research Resources (HEW/NIH)	035201-035300
National Institute of Neurological and Communicative Disease and Stroke (HEW/NNCDS)	035301-035400
National Institute of Child Health and Human Development (HEW/NCHHD)	035401-035450
National Heart, Lung, and Blood Institute (HEW/NHLB)	035451-035550
National Institute on Aging (HEW/NIA)	035551-035600
National Institute of Arthritis, Metabolism, and Digestive Diseases (HEW/NAMDD)	034601-035700

EPA Region VIII — Denver (EPAVIII)	076801-076900
EPA Region IX — San Francisco (EPAIX)	076901-077000
EPA Region X — Seattle (EPAX)	077001-077101

Log agency	Federal Inventory log number range
Department of Energy (DOE)	080001-110000
Assistant Secretary for Environment (DOE/ASEV)	080001-093000
Argonne National Laboratory (DOE/ANL)	080001-081000
Brookhaven National Laboratory (DOE/BNL)	081001-082000
Lawrence Berkeley Laboratory (DOE/LBL)	082001-083000
Lawrence Livermore Laboratory (DOE/LLL)	083001-084000
Los Alamos Scientific Laboratory (DOE/LASL)	084001-085000
Oak Ridge National Laboratory (DOE/ORNL)	085001-086000
Pacific Northwest Laboratory (DOE/PNL)	086001-087000
Albuquerque Operations Office (DOE/AO)	087001-087500
Chicago Operations Office (DOE/CO)	087501-088000
Idaho Operations Office (DOE/IO)	088001-088500
Nevada Operations Office (DOE/NO)	088501-089000
Oak Ridge Operations Office (DOE/ORO)	089001-089500
Richland Operations Office (DOE/RO)	089501-090000
San Francisco Operations Office (DOE/SFO)	090001-090500
Savannah River Operations Office (DOE/SRO)	090501-091000
DOE Headquarters (DOE/H)	091001-092000, 092501-093000
Grand Junction Operations Office (DOE/GJO)	092001-092500
Assistant Administrator, Fossil Energy (DOE/FE)	093001-093100
Assistant Secretary for Resource Applications (DOE/RA)	093101-094000, 100001-100100
Assistant Administrator, Solar, Geothermal, and Advanced Systems (DOE/SGE)	094001-094100
Director of the Office of Energy Research (DOE/ER)	094101-095000
Assistant Administrator, Nuclear Energy (DOE/NE)	095001-095100
Assistant Secretary for Energy Technology (DOE/ET)	095101-096000
Assistant Administrator, Conservation (DOE/C)	096001-096020
Assistant Secretary for Conservation and Solar Application (DOE/CSA)	096021-096100, 096101-097000
Assistant Administrator, Planning and Analysis (DOE/PA)	097001-097100
Assistant Secretary for Policy and Evaluation (DOE/PE)	097101-097500
Assistant Secretary for Defense Programs (DOE/DP)	097501-097550

Log agency	Federal Inventory log number range
Administrator of Energy Information Administration (DOE/EIA)	097551-097600
Assistant Secretary for International Affairs (DOE/IA)	097601-097650
Assistant Secretary for Intergovernmental and Institutional Relations (DOE/IIR)	097651-097700
EPA "Pass Thru" to DOE (Assistant Secretary for Environment) (DOE/EPA Pass Thru)	098001-099000
Federal Energy Administration (FEA)	100000-110000
National Science Foundation (NSF)	110001-120000
National Science Foundation/Research Applied to National Needs (NSF/RANN)	111000-112000
National Aeronautics and Space Administration (NASA)	120001-130000
Tennessee Valley Authority (TVA)	130001-140000
U.S. Coast Guard (USCG)	140001-150000
Nuclear Regulatory Commission (NRC)	150001-160000
